

Installation Guide for Infrared Drone Human Detection System

Disclaimer

This installation guide is based on a rough example of what the deployment script and installer will look like once the application is complete. The steps may be subject to change based on the final implementation of the application.

System Requirements

Before proceeding with the installation, make sure your system meets the following requirements:

- Windows 10 or later
- .NET Framework 4.5 or higher
- At least 2 GB of RAM
- At least 500 MB of free disk space

Installation Steps

Step 1: Download the Installer

Download the installer file (**setup.exe**) from the official website or other trusted sources.

Step 2: Run the Installer

1. Locate the downloaded **setup.exe** file in your Downloads folder.
2. Double-click on **setup.exe** to launch the installer. You may receive a security warning; click "Run" to proceed.

Step 3: Installer Welcome Screen

The installer will open with a Welcome screen. Click "Next" to continue.

Step 4: License Agreement

Read through the license agreement. If you agree to the terms, select "I agree" and then click "Next."

Step 5: Choose Installation Folder

1. The installer will suggest a default folder for installation. To use a different folder, click "Browse" and select your preferred location.
2. Click "Next" to proceed.

Step 6: Additional Components

If the installer provides options for additional components, make your selections and click "Next."

Step 7: Installation

1. The installer will now copy the necessary files to your system. This may take a few minutes.

2. Once the installation is complete, you'll see a confirmation message. Click "Finish" to close the installer.

Step 8: Running the Application

1. You can start the application by clicking on the Start Menu and searching for "Infrared Drone Human Detection System."
2. Alternatively, you can double-click the desktop icon if you chose to create one during the installation.

Troubleshooting

If you encounter issues during installation:

- Ensure you have sufficient disk space and meet the system requirements.
- Run the installer as an administrator by right-clicking on **setup.exe** and selecting "Run as administrator."
- Consult the FAQs or reach out to customer support for further assistance.

Uninstallation

To uninstall the application:

1. Open the Control Panel and go to "Programs and Features."
2. Locate "Infrared Drone Human Detection System" in the list, select it, and click "Uninstall."
3. Follow the on-screen instructions to complete the uninstallation.

Conclusion

This guide outlines the steps for installing the Infrared Drone Human Detection System application. Follow these steps carefully to ensure a successful installation.
